

News Release for Colerain Fire

For Immediate Release

Date: **March 23, 2014**

Due to strict safety regulations involved with operating a large scale recovery site like the one on East Miami River Road, it is impossible to allow media access to the actual work areas. Therefore, in order to provide additional images/ raw video from the worksites, Colerain Township has created a **Vimeo** account with images and videos taken this afternoon. We hope that the provision of this media will meet your requirements in getting you the information you need.

The Colerain Fire Department **Vimeo** videos can be found here:

<http://vimeo.com/89875367>

<http://vimeo.com/89875368>

Both videos can be accessed via either number. Each still image is set for approximately a 10 second view to allow for capture to individual devices.

The images and videos are available for you to download for use in your presentations/news packages as you see fit. We ask that credit be given back to Colerain Fire Department as the provider of the images.

In addition to these images, please remember that the EPA website is still being updated daily with new images and operational notes: www.epaos.gov/midvalleycruderelease

As operations continue, the CTFD will continue to upload new videos and images for your use.

Questions or inquiries into this incident may be directed to Public Information Officer: Captain Steve Conn at 513-615-8698, sconn@colerain.org,
