

EPA PUBLIC NOTICE

Administrative Record Available for Public Comment Former Exide Technologies Site

The U.S. Environmental Protection Agency (EPA) announces the availability of the Administrative Record for cleanup activities at the Former Exide Technologies Site located in Laureldale, PA. EPA's cleanup efforts include dismantling and decontaminating some of deteriorating and structurally compromised smelter components, including five baghouses and associated duct work. The Administrative Record contains documents about the cleanup which describe why the cleanup is necessary, and how public health and the environment will be protected by this removal action.

The Administrative Record file can be viewed at the following locations:
